

# Tour of Corsica (Day 3)

Road

Distance : 112 km   Elevation : 1750 m   Difficulty : 2

Start point : Col de Bavella   End point : Sartène

The stage between the col of Bavella and Sartène is not difficult, compared to the 2nd day. A nice road for the most part downhill and flat, through the forest and along the Ortolo river.

## Descent to Palavesa

To rest from the previous day, the first 40 kilometers to **Palavesa** are downhill. The road skirts the **Ospedale** reservoir, then goes deep into the forest. It's really quiet and relaxing.

*The Ospedale reservoir and the forest road to Palavesa*

## Sartene

The continuation is no more difficult with a passage through **Muratello, Figari, Pianottoli**. The traffic gets a little heavier, following the **"T40"**. At the 90<sup>th</sup> kilometer, the road forks right to follow the **"D250"** and becomes narrower following **the Ortole**. Another ten kilometers or so uphill along the river, before descending to **Sartène**.
