The most beautiful pictures

The ice palace, located a few kilometers from the "Lac Noir", in the canton of Fribourg, is a to do with the family at nightfall. The park offers a journey between castle and ice caves, built on iron and wood structures, then sprinkled with water, as long as the temperature is between -2° and -10°. It's worth a look.

In the proximity of the “Lac Noir”, in the canton of Fribourg, there is a fairy tale construction. The ice palace, whose main dome is 12m high, is a delight for young and old.

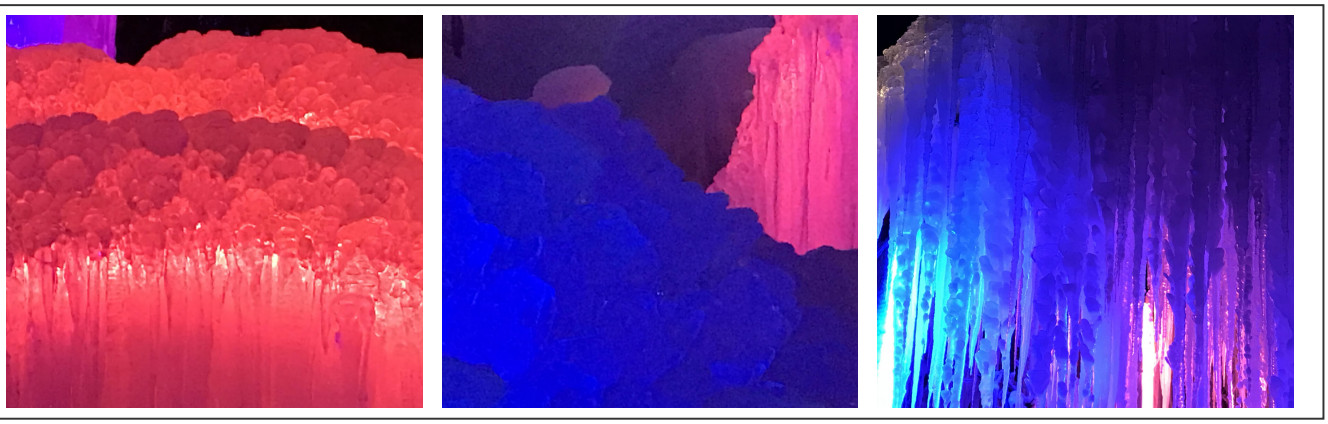

Its creator, **Karl Neuhaus** is now 84 years old.

Bring hats, gloves, and good shoes.

Light effects through the ice
